**L-3 Warrior Systems Selects Summit Night Vision Group  
as Domestic Distributor for L-3 Image Intensifiers and Night Vision Components**

**Plano, Texas, November 1, 2011** – Summit Night Vision Group LLC announced today a new distributor agreement with the Electron Tube Operations Division of L-3 Warrior Systems for L-3 Gen 3 image intensifier tubes and other night vision components.

Summit Night Vision Group, one of only two new exclusive domestic distributors for L-3 Warrior Systems' Electron Tube Operations, was selected due to its proven track record of supporting resellers and original equipment manufacturers seeking quality L-3 night vision tubes for fulfillment of commercial, government and military contracts and requirements. Summit Night Vision Group has been the largest Platinum Distributor of L-3 Night Vision products since 2009.

In addition to the L-3 Generation III image intensifier tubes, Summit Night Vision Group was also named the resource for highly sought after L-3 Warrior Systems' image intensified system spare parts and night vision components.

"Summit Night Vision provides value to the entire night vision industry vertical by offering superior customer responsiveness, fast delivery times and unrivaled pricing for L-3 products," said Summit Night Vision Group's President and CEO, Dean Cuzick (US Army Major, Ret.), "and now L-3 is formally recognizing that value as a critical link in its supply chain by naming Summit one of only two sources for L-3 image intensifiers and system components for non-US Military customers."

Summit Night Vision Group is a Service-Disabled Veteran-Owned Small Business that supports the Domestic U.S. and International commercial and government night vision industry. Summit is the market leader in wholesale distribution of L-3 image intensified products as well as night vision system housings and shell kits, night vision accessory solutions, tactical laser pointers and illuminators, thermal imaging systems, infrared sensor cores and customer-branded night vision systems.
